Printing & Media Technology  
Vienna, Austria

## INTERESTS\*

DESIGN	TRAVEL	RUNNING	COOKING
COFFEE	MUSIC	BOOKS	MOVIES

\*When I'm not at a living room dance party with my two daughters or attending a tea party.

## EXPERIENCE

2012 - Present

**TELUS International**  
Senior Graphic Designer

I have been working as a graphic designer at CCC Holding GmbH & TELUS International for over 11 years and am responsible for the company's entire corporate identity.

My tasks include the development and implementation of creative concepts to continuously strengthen the brand identity. I am also involved in projects covering various areas such as graphics, video, photography, social media, print and events. This diverse experience enables me to design comprehensive and consistent visual solutions that effectively represented CCC & TELUS International's brand message.

In my many years of work, I have not only continuously developed my professional skills, but have also grown personally.

2008 - 2011

**Popolini BMK GmbH**  
Graphic Designer & Web Designer

In my two years at Popolini, I gained extensive experience in graphic design, web design and photography. In my role, I was largely responsible for designing and maintaining the company's visual identity. In addition, I was responsible for the internal photo studio, where I was able to gain valuable experience in the world of photography during the shoots I organized.

2007 - 2008

**Computa Center Barcelona**  
IT Support & Team Manager

In addition to solving challenging technical problems for Air Liquide employees worldwide, my focus was also on training and managing the German-speaking team.

2007 - 2008

**Printing House Robitschek**  
Prepress

I already gained valuable knowledge during my school education through an internship in prepress. This experience not only developed my skills in this area, but also broadened my view of my future career path. In prepress, I was able to gain practical insights from file preparation to print preparation and actively participate in projects. This not only improved my technical skills, but also strengthened my enthusiasm for prepress as an integral part of graphic design.
